Code  
MIL-340-SA

Product  
Twin Motor Lift Chair Sand

**Milton not only offers the ultimate reclining experience but also lifts to help you rise to your feet.** Milton chairs have been designed with comfort, style and ease of use as a priority. A twin smooth running motor is operated by an easy to use remote that can be found in its own discreet pocket on the side of each chair. Simply use the remote to gently tilt forward allowing you to push off the padded rounded arms to a standing position or sit down, gently recline, put your feet up and relax with ease at the end of the day. This versatile chair is well-crafted and well-designed from quality made components which are then dressed in durable, neutral fabrics in a choice of zinc or sand which will fit within your current décor.
